### **DETAILED ACTION**

1. This action is response to application number 10590937 applicant Pre-Brief Conference request, filing date 09/15/2010.

### **Allowable Subject Matter**

2. Claims 8-14 are allowed.

The following is a statement of reasons for the indication of allowable subject matter.

The independent claims disclose optimizing bandwidth use of bandwidth on an RTP link. A packet loss rate for the link is monitored to determine whether it is unacceptably high. The sending rate is then adapted by re-packetizing media (1) to increase the size of packets sent over the link if the rate of packet loss is too high in order to reduce the packet header overhead, or (2) to decrease the size of the packet sent over the link when the rate of packet loss is within acceptable limits to reduce the transmission delay over the link.

The best prior arts of record, Vimpari, in the same field of endeavor, optimizing bandwidth use of bandwidth on an RTP and monitoring packet loss rate for the link, Vimpari further discloses the better the conditions on a communications connection, the greater the number of data blocks that can be attached to a single RTP packet to be transferred. If, on the other hand, the conditions on the communications connection become worse, the number of data blocks, hereinafter called basic packets, to be included in a single RTP packet is reduced... Conversely, in good conditions it is possible to benefit from the decrease of the average proportion of header data per one basic packet in the longer RTP packets and to transfer more user data per unit time on

Art Unit: 2471

the same physical transfer channel. Vimpari teaches the opposite of what is claimed, 1) to increase the size of packets sent over the link if the rate of packet loss is too high in order to reduce the packet header overhead, or (2) to decrease the size of the packet sent over the link when the rate of packet loss is within acceptable limits to reduce the transmission delay over the link.

Therefor prior arts of record, as a single reference, or as a combination, do not teach the limitations of the claims 8-14. Thus, claims of invention are found to be novel and unobvious over prior art of record.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
